

GYPROCK®

Everything else is just plasterboard

Superchek™

Tougher, quieter and a
better environmental choice

Everything else is just plasterboard

Simply a better choice

For a superior interior finish to your home, Gyprock Superchek™ is tougher, quieter and a better choice for the environment.

Plasterboard is used as a wall and ceiling lining material in all modern homes and the quality of the plasterboard that your builder uses can have a dramatic impact on the quality of your home.

If you care about high quality and environmental sustainability, Gyprock Superchek™ is your ideal choice for a quieter, more durable and sustainable prestige home.

Your builder may have already included Superchek™ in your new home. If not, just ask and you'll be pleasantly surprised at how little it can cost to upgrade.

One plasterboard, three amazing benefits

Gyprock Superchek™ is a premium plasterboard manufactured with a denser core and heavy duty facing material. These qualities combined with a special plaster formulation featuring high levels of recycled material make the board tougher, quieter and greener.

Tougher

Better resistance to dents and scrapes from things such as furniture and school bags.

Compared with standard plasterboard, Gyprock Superchek™ requires double the force to impose a discernable surface indentation.

Quieter

Better sound absorption and less noise transfer for a quieter, more comfortable home.

Superchek™ provides a 15% reduction in perceived loudness compared to standard plasterboard. When installed in ceilings of multi-storey homes, Superchek™ can also reduce noise levels between floors.

Greener

Recognised by Good Environmental Choice Australia as a better environmental product for walls and ceilings.

Gyprock Superchek™ in your home can give you greater environmental peace of mind and the prestige of longer lifecycle durability.

A better Environmental Choice

Good Environmental Choice Australia (GECA) is internationally recognised as Australia's leading certifying body for sustainable products.

In certifying products, GECA places a particular emphasis on the efficient use of resources, the fitness for purpose of the product and the use of non-hazardous materials.

Gyprock Superchek™ is manufactured with a high level of recycled material that would otherwise require disposal in landfill. Also, the product is designed to have a durability in use that exceeds conventional plasterboard lining products.

CSR Gyprock™ Warranty

Gyprock™ products are manufactured for life with all CSR products designed to achieve optimal performance when part of a CSR integrated system. Gyprock™ continues to lead the market with premium quality products which are the preferred choice of plastering professionals. Gyprock™ plasterboard products are manufactured to the Australian Standards AS2588 providing confidence in quality of product and support.
