

DIY Acrylic Stud Adhesive

Gyprock DIY Acrylic Stud Adhesive is a simple and easy to use water soluble adhesive that adheres plasterboard sheets to timber wall studs and ceiling joists as well as metal framing members. It is specially formulated to offer excellent adhesion properties and is easily identified, once installed, by its distinctive blue colour.

Recommended Use

DIY Gyprock Acrylic Stud Adhesive is used for adhering plasterboard and fibre cement wallboard to timber or steel frames. It is recommended to use DIY Acrylic Stud Adhesive with Gyprock Repair Panels for minor repair and maintenance applications. It is suitable for use with pre-painted metal battens and some treated timber in residential applications. Stud adhesive should be used in conjunction with nail or screw fasteners to constitute a functional fixing system.

Important

- DO NOT use DIY Acrylic Stud Adhesive on Tiled Wet Area Systems.
- DO NOT rely on stud adhesive in Fire Rated systems.
- Daubs of adhesive must never coincide with fastener points.
- DIY Acrylic Stud Adhesive should not be used when the temperature is less than 5°C.
- Fix board within 20 minutes of applying adhesive to the frame.
- If liquid has separated from compound, re-mix before use.
- Ensure surfaces are free from oil, grease or other foreign materials before use.
- Always use clean tools.
- Replace lid when not in use.

Storage

Store buckets of compound in a dry environment out of direct sunlight. Remove lid and stir prior to use. Unused product should be stored by resealing the original bucket. Remix prior to use. Discard if drying has commenced.

Product Features

DIY Range

Professional quality in convenient pack sizes

Superior Adhesion

Good initial grab and excellent adhesion properties

Easy Application

Apply with a stud adhesive applicator

Australian Made

Gyprock DIY Acrylic Stud Adhesive Specifications	
Feature	Description
Colour	Blue
Packaging	1kg re-sealable pail
Shelf Life	12 months from date of manufacture
Specific Gravity	1.3-1.7
VOC Content (as specified by GBCA)	22g/L as VOC content per material
Product Manufacture	DIY Acrylic Stud Adhesive is manufactured by CSR Gyprock in Australia and made to stringent product specifications.

Application

- Apply Acrylic Stud Adhesive to the studs with a broadknife, using enough material to form 'walnuts' of adhesive 25mm in diameter and 15mm high.
- Apply walnut sized daubs of adhesive at 300mm max (for wall applications), 230mm max (for ceiling applications), and 200mm min centres from the nailing points at sheet edges and no closer than 200mm fixing points.
- Press Gyprock plasterboard against frame and hold in place for 24 hours by screws through a temporary Gyprock block at the centreline of the sheet on every second stud.

Installing to Standards

Installing to Standards AS/NZS2589: Gypsum linings – Application and Finishing outlines the procedures for jointing and finishing of Gyprock plasterboard in conjunction with additional details contained in Gyprock Technical Literature.
