

Gyprock Ultra-Top™

Gyprock Ultra-Top[™] is a lightweight formulation that has been engineered to offer superior coverage, ultra-light to mix and apply, ultra-creamy for excellent spreadability, and ultra-easy to sand for an ultra-smooth finish.

Recommended Use

Gyprock Ultra-Top is used as a top coat in a three-coat plasterboard jointing system, suitable for finishing plasterboard and fibre cement joints, angles, and fastener heads in residential and commercial walls and ceilings. To achieve the ultimate joint finish, it is recommended Gyprock Ultra-Top is used in conjunction with Gyprock Base Coats or All-Purpose compounds.

Important

- Do not use Ultra-Top for bedding tape or laminating plasterboard sheets.
- In wet area applications, topping compounds should not be used on areas to be tiled.
- Gyprock Ultra-Top can be thinned sparingly with water if required.
- Do not apply a setting compound over Ultra-Top
- Ultra-Top should not be used when the interior lining temperature is less than 8°C.
- Ensure surfaces are clean from dust or dirt.
- Before use, remix to a smooth creamy consistency.
- Always use clean containers and equipment.
- Thoroughly clean tools after use
- Replace lid when not in use.

Storage

Store buckets of compound in a dry environment out of direct sunlight. Remove lid and stir prior to use. Unused product should be stored by resealing the original bucket. Remix prior to use. Discard if drying has commenced.

Product Features

Ultra-Smooth Finish

Ultra-light and creamy consistency with excellent sandability and superior coverage

Pre-mixed

Quick to prepare and ultra-easy to apply

Versatile Application

Hand or machine tool applied

Australian Made

Plasterboard Finishing

Jointing and finishing of Gyprock plasterboard interior installations is to be carried out in accordance with **FIGURE 1** and **TABLE 1** in this document, and the following details, so as to provide a smooth surface for decorating. Stopping and external corner beads are to be applied to all edges subject to damage. A Level 4 Finish is generally the accepted level of finish for residential construction as detailed in AS/NZS2589.1 and is also recommended for commercial construction. This requires a three-coat system, consisting of:

- Tape and tape coat
- Second coat and
- Finish (or topping) coat.

Hand Application

- 1. Allow adequate time for the second coat to harden before applying the Gyprock Ultra-Top final coat.
- 2. Using a 250mm or 300mm broadknife, apply a thin topping coat of Ultra-Top wide enough to conceal the previously coated joint. Feather the edges of the compound with a trowel.
- Using a 100mm broadknife, cover previously coated fastener heads, overlapping about 25mm.

Machine Application

Apply a thin topping coat of Gyprock Ultra-Top using a 250mm or 300mm finishing box.

Sanding

Allow Ultra-Top to dry for at least 24 hours. Sand to a smooth finish using 180 grit sandpaper or 180-220 grit sanding mesh.

Painting

Apply all paints in accordance with paint manufacturer's recommendations.

Installing to Standards

Installing to Standards AS/NZS2589: Gypsum linings – Application and Finishing outlines the procedures for jointing and finishing of Gyprock plasterboard in conjunction with additional details contained in Gyprock Technical Literature.
