

Product Data Sheet

Symphony™ Cornice

Gyprock Symphony cornice combines smooth curves, and a strong central shadow lines and sharp upper step to make this classic 75mm cornice an ideal way to introduce a more formal style into a home.

Product Overview

While cornice effectively bridges the junctions between walls and ceilings, its purpose extends beyond function, providing the perfect finishing touch to the aesthetic harmony of a home.

Symphony's multidirectional smooth curves create an appealing wave effect that exudes elegance.

When balanced with other interior design features such as architraves, skirting and even door hardware, cornice can help make a subtle or dramatic style statement in a home. Gyprock Concerto's curves and strong central step make it an ideal compliment for a more dramatic effect.

Typical Applications

Symphony's subtle curves make it the perfect choice for more formal or traditional styled homes, while the soft curves also make it ideal for rooms that have lower ceilings.

Technical Specifications

Product Options

Symphony Cornice is available in the following size

Width	75mm
Length	4800mm

Stockholdings may vary. For product availability and to place an order, contact your **nearest supplier**.

Product Manufacture

Symphony Cornice is manufactured by CSR Gyprock in Australia to stringent product specifications.

Product Handling

Transportation and manual handling: Refer to the **Gypsum Board Manufacturers of Australia (GBMA) website** for recommended OH&S practices.

Storage: Protect plasterboard and cornice from weather and moisture. Avoid products sagging by storing horizontally, supported on a level platform or full-width support members spaced at max. 600mm centres.

Health and Safety

Safety Data Sheets are important documents in the construction industry and assist in the continuing focus on occupational health and safety on and off sites.
